

The Watcher's Song
by Griff Sanford

Capo 3, 4/4, slow fingerpicking

Dm Am E Am

Verse 1

Dm Am
I've watched over you every morning
E Am
I've watched over you every noon
Dm Am
I've watched over you every evening
E Am
I've hoped that I would meet you soon

I've watched over you from a distance
I've watched over you from afar
I've watched over you and your family
I've watched to keep alive the hope you are

Chorus

Dm Am
I've failed the others but I must not fail you too
E Am
I'm a shadow of the man I used to be
Dm Am
There are many things that I can never tell you
E
But I hope (know) the Force is with you,
Am
We will see (Now I see)

Verse 2

I see how your father has hurt you
I see how you long for his love
I know I must never desert you
I know just what you are dreaming of

I see in you much of your mother
I see all her poise and all her calm
I know you are twin to another
But I cannot give you that balm

Chorus

Verse 3

I've watched you for over an aeon
I've watched over you for a day
You've found me and we are together
It is time to see how much I need to say

Come with me and fight for our freedom
Come with me and shoot for the sky
Come with me and join the Rebellion
And someday, you'll even know why

Chorus

Outtro

Am
Now I see

E Amsus2
